PROFILE

Independent Egypt-based developer with 16 months of Flutter/Dart experience, a published Android app and bilingual Flutter/Laravel client work. Nine verified upstream engineering PRs merged into external open-source projects. Available for paid remote development roles.

VERIFIED UPSTREAM ENGINEERING / 9 MERGED PRs

- **Flutter framework | Web slider accessibility | #195564**
  Corrected slider accessibility value/range initialization when re-enabling a disabled control.
- **Dart-Code | DTD WebSocket request lifecycle | #6367**
  Prevented hanging RPC requests and non-OPEN socket sends after disconnect and disposal; regression-tested and merged by DanTup on 9 November 2026.
- **Dart-Code | Async lifecycle safety | #6349**
  Stopped asynchronous callbacks after VS Code extension disposal. Merged 5 November 2026.
- **Dart-Code | Deterministic command tests | #6373**
  Stubbed real Dart/Flutter spawns. A focused local test group improved from ~24s to ~3s.
- **Apple-maintained pkl-neovim | LSP configuration | #75**
  Corrected nested language-server settings with headless regression checks. Merged Nov 3.

Also merged in Dart-Code: #6301 (project discovery), #6324 (project creation), #6337 (SDK precedence) and #6332 (package tests). All links: github.com/NemesisDevX

PRODUCTS AND CLIENT WORK

- **Tasbehati | Published Flutter Android app**
  Quran, adhkar and worship tools; Firebase, AdMob and production crash investigation.
- **FamilyMove | Private client pilot - not publicly launched**
  Flutter + Laravel 13 / Filament 5; bilingual family workflows, reporting, notifications and consent-aware AI integration.

ENGINEERING TOOLKIT

Flutter, Dart, Android, Firebase, FCM, RTL, REST APIs | TypeScript, VS Code tooling, CI, regression tests | PHP, Laravel, Filament, SQL, Python, FastAPI, Docker, API testing, Git

EDUCATION AND AVAILABILITY

Egyptian secondary education in progress (expected 2027). Self-directed engineering through shipped software, upstream reviews and client work. Available for remote roles.
